

## *Light vehicle weigher*

**model SPF**

*4 load cell platform  
Capacity up to 10,000 kg  
Robust IPE 140 steel beam support structure  
6 mm durbar deck plate  
Recommended for weighing small and medium size vehicles*

# SPF light vehicle weigher

## Main features

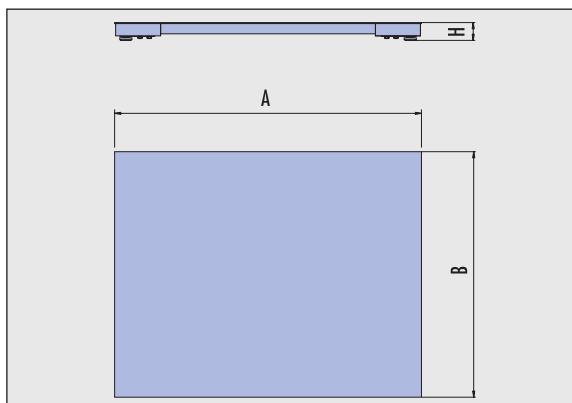

- The robust, low profile SPF light vehicle weigher offers the ideal cost/space effective platform weigher for light vehicles
- With a maximum capacity of 10,000 kg, it can be used for a wide range of light commercial vehicles and is ideal for applications such as parcel delivery vehicles, mini skip hire vehicles and agricultural vehicles
- The scale features adjustable levelling feet and a strong 6 mm durbar deck plate
- The scale can be pit mounted or surface mounted incorporating the optional steel ramps
- The four stainless steel loadcell design can be used with any of the Bilanciai Group weight terminals, software packages and printers
- Trade approved version or for internal use
- Additional peripherals are also available-information on request
